Introduction

This “2018 Report to the Governor and Legislative Leaders on Power Programs for Economic Development” (“Report”) is submitted by the Power Authority of the State of New York (the “Authority” or “NYPA”) pursuant to Public Authorities Law (“PAL”) §§ 1005(18), (23) and (24)(e).

Subdivision 18 provides:

18. For the purpose of furnishing the state with systematic information regarding the status and the activities of the authority, the authority shall submit to the governor, the temporary president of the senate, speaker of the assembly, the minority leader of the senate and the minority leader of the assembly, within ninety days after the end of its fiscal year, a complete and detailed annual report on each economic development power program it administers. Such annual report shall include, but not be limited to, the following information:

- a. the number of recipients of economic power program benefits, the economic region in which each recipient is located, the type and amount of assistance provided, megawatts of power awarded, length of current contract, current contract compliance status, last audit, number of jobs retained and/or added in the fiscal year, approximate energy efficiency savings and amount of power reallocated from previous years due to forfeited benefits; and¹*
- b. cost to the authority to provide economic development power programs during the previous fiscal year.*

Subdivision 23 provides:

23. The authority shall include in the annual report prepared pursuant to subdivision eighteen of this section, an accounting for the subject year that provides (a) the amount of expansion power and replacement power sold into the wholesale market by the authority, and (b) the net earnings, as such term is defined in section one hundred eighty-nine-a of the economic development law, paid into the western New York economic development fund.

Paragraph (e) of subdivision 24 provides:

(e) The authority shall include in the annual report prepared pursuant to subdivision eighteen of this section, an accounting for the subject year that provides the amount of St. Lawrence county economic development power sold into the wholesale market by the authority, and the net earnings paid into the northern New York economic development fund.²

To simplify the presentation of the information required by PAL § 1005(18), (23) and (24)(e), the Authority has combined the reporting requirements of these statutory provisions in this Report.

A. Recharge New York Power Program

Program Details

Chapter 60 (Part CC) of the Laws of 2011 (“Chapter 60”) created the Recharge New York (“RNY”) Power program. The RNY Power program makes 910 megawatts (“MW”) of “Recharge New York Power” (“RNY Power”) available to “eligible applicants” for the purpose of attracting new businesses and retaining and expanding existing businesses throughout the State of New York.

New York Presbyterian Hospital in New York City is one of several not-for-profit hospitals from throughout New York State that benefit from the ReCharge New York program. Twenty-four hour, seven-day-per-week large medical facilities use plenty of electricity and under the ReCharge program these facilities save thousands of dollars monthly in electric costs.

¹ None of the statutes authorizing the programs discussed in this Report require a program participant to establish energy efficiency savings in connection with the receipt of power under the program. Therefore, the Authority is unable to report on this specific information.

² PAL § 1005(14) calls for reporting on the status of “economic development power,” a program created by Chapter 32 of the Laws of 1987 which was, in the program’s later years, supported with market-based power. Components of that program were allowed to expire or were repealed in view of the creation of the Recharge New York Power program in 2011. Therefore, the economic development power program is no longer administered. Accordingly, there is no information to report on economic development power in response to PAL § 1005(14).

The RNY Power resource is comprised of: (1) fifty percent (50%) of firm hydroelectric power from the Authority's Niagara and Saint Lawrence-FDR hydroelectric projects ("RNY Hydropower") that was withdrawn, effective August 1, 2011, from the utility corporations that had purchased such power for the benefit of domestic and rural consumers; and (2) fifty percent (50%) of power procured by the Authority through market sources, a competitive procurement process, or Authority sources (other than the Niagara and Saint Lawrence projects) (collectively, "RNY Market Power").

Pursuant to Chapter 60, the Authority has been authorized, as of July 1, 2012, to "make available, contract with and sell" to eligible applicants such RNY Power allocations as are recommended by the Economic Development Power Allocation Board ("EDPAB"). RNY allocations consist of equal parts of RNY Hydropower and RNY Market Power.

Pursuant to Chapter 60 and by order of the NYS Public Service Commission, the State's retail utilities are required to deliver RNY Power at a discount. In essence, the discount derives from exempting RNY Power from the Renewable Portfolio Standard Surcharge and the Systems Benefit Charge, including the Energy Efficiency Portfolio Standard surcharge.

The delivery discount applies to a Customer's total RNY Power allocation even if the Customer decides to purchase the RNY Market Power component of its allocation from a non-NYPA source. If a customer declines to purchase RNY Market Power from the Authority, the Authority has no responsibility for supplying such power to the customer for the term of the allocation.

Projected Availability

As of December 31, 2018, a balance of 151.27 MW of RNY Power was available for allocation to eligible applicants.³

Current Allocations

As of December 31, 2018, 861 allocations of RNY Power had been approved by the Authority for 762 eligible applicants totaling 758.73 MW. All current RNY Power awards, including recipient name, location, region, MW of power awarded, length of current contract, and total number of jobs committed to be retained or added are listed in

International Paper's Ticonderoga Mill (Essex County) benefits from four megawatts of ReCharge New York power to help keep electric costs down. International Paper is one of the world's leading producers of fiber-based packaging, pulp and paper.

Exhibit I to this Report. All program statistics include pending, suspended and in-service allocations.⁴

In 2018, Authority staff conducted a cost savings analysis for RNY customers for the period of January 1, 2017 to December 31, 2017. It was determined that RNY Power allocations collectively provided program participants an estimated cost benefit of more than \$48 million. The estimated cost benefits are based on a comparison of the cost of RNY Power vs. the local utility standard electric tariff rates, reflecting commodity and estimated delivery costs.

The Authority commenced making allocations of RNY Power in fiscal year 2012. As of the end of 2018, the RNY Power program was supporting the retention and/or creation of 377,414 jobs.

Compliance Information

In 2018, Authority staff conducted its sixth annual compliance review of customers receiving power allocations under the RNY Power program for the reporting period from July 1, 2016 through June 30, 2017. The compliance review examined RNY Power customer contract compliance in 3 areas: (1) job retention; (2) capital investment; and (3) power utilization (the "Supplemental Commitment Areas"). Of all RNY customers included in this compliance review reporting period, 618 customers received RNY Power for an entire 12-month period and thus were in a position to be evaluated in the Supplemental Commitment Areas.

³ This amount of unallocated RNY Power may not be available to all eligible applicants. The underlying statute specifies set-asides and caps on the amount of RNY Power that may be allocated for purposes of business retention and expansion, and certain categories of eligible applicants (e.g. small businesses and not-for-profit corporations). See Economic Development Law § 188-a(c)(4).

⁴ Examples of pending allocations include awarded allocations that (i) have not yet been addressed in a contract between NYPA and the awardee, and (ii) have been addressed in such a contract, but not yet placed into service by the awardee.

The underlying RNY Power contract specifies the customer's commitments for job retention, capital investment and power utilization (collectively, the "Supplemental Commitments"). The Authority may reduce a customer's RNY Power allocation and contract demand if the customer fails to achieve at least a 90% compliance rate for a specific Supplemental Commitment.

The Authority chose to enforce the Supplemental Commitment Areas at a 90% level for the RNY Power program for this specific compliance review reporting period. Where the Authority took compliance action against non-compliant customers, it also adjusted the Supplemental Commitments of such customers in light of the reductions made to the power allocations and contract demands of such customers. As a result of compliance action taken for this compliance review reporting period, the Authority reduced power allocations and contract demands for 63 RNY power customers, resulting in a 7.5 MW overall reduction of allocated RNY Power for this reporting period.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year for noncompliance or other reasons is approximately 37.8 MW.⁵ It is not possible to identify precisely what portion of forfeited power was reallocated because at any given time during the reporting year there is some amount of unallocated power.

Dairy products manufacturer, H.P. Hood in Oneida receives both ReCharge New York retention and expansion allocations totaling just over one megawatt. The manufacturing company completed an expansion project in June 2018 to allow for additional milk production.

B. Expansion Power

Program Details

Under PAL § 1005(13), the Authority is authorized to contract, allocate or reallocate directly, or by sale for resale, 250 MW of firm hydroelectric power as "Expansion Power" ("EP") to eligible businesses in the State located within 30 miles of the Niagara Power Project, provided that the amount of Expansion Power allocated to businesses in Chautauqua County on January 1, 1987 continues to be allocated in such county.

Projected Availability

As of December 31, 2018, a balance of 67.5 MW of EP was available for reallocation to eligible businesses.

Current Allocations

As of December 31, 2018, 89 allocations of EP had been approved by the Authority to 66 companies totaling 182.49 MW. All current EP allocations, including recipient name, location, and region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit II to this Report. All program statistics include pending and in-service allocations.

As of the end of the 2018 fiscal year, the EP program was supporting a total of 22,769 jobs.

Compliance Information

In 2018, Authority staff conducted its annual compliance review of customers receiving hydropower under the EP Program covering the reporting period of January 2017 through December 2017. The compliance review examined contract compliance in the Supplemental Commitment Areas.

Of all EP customers included in this compliance review reporting period, 63 customers received EP for an entire 12-month period and thus were in a position to be evaluated for compliance.

The underlying EP contract requires the customer to achieve at least a 90% compliance rate for each Supplemental Commitment in order to avoid compliance action. As it did with the RNY Power Program, the Authority chose to enforce Supplemental Commitments of EP customers at a 90% level for this specific compliance review reporting period. Where the Authority took compliance action against such customers,

⁵ For purposes of this report, the Authority is interpreting the term "forfeited" to mean any instance of surrender of previously-allocated power whether due to non-compliance, a lack of need for any portion of an allocation, a reduction in the business operations of a customer, or some other reason.

Magellan Aerospace's facilities on Long Island and in Queens all benefit from the ReCharge New York program. Here workers at the West Babylon facility (Suffolk County) assemble an aerostructure component.

“Magellan Aerospace remains a successful and competitive business in New York State and one of the reasons why is because of the value and reduced electric cost as a customer in the Recharge NY program.”

JOHN MARCELLO

Director Planning - North America, Magellan Aerospace

it also adjusted the Supplemental Commitments of such customers in light of the reductions made to the power allocations and contract demands of such customers. As a result of compliance action taken for this compliance review reporting period, the Authority reduced power allocations and contract demands for 1 EP customer. The total allocation reduction was 0.1 MW.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year for noncompliance or other reasons is approximately 30.5 MW.⁶

It is not possible to identify precisely what portion forfeited power was reallocated because at any given time there is always some amount of unallocated power. Comparing

the total amount of power allocated as of the close of the reporting year with the total amount of power allocated as of the close of the previous year may provide a rough indication of allocation trends although such information may not account for changes in allocation levels that occur within a particular reporting year.

C. Replacement Power

Program Details

“Replacement Power” (“RP”) consists of 445 MW of firm hydropower generated by the Authority at its Niagara Project in accordance with PAL § 1005(13). To qualify for RP a business must have facilities for the receipt of RP located within 30 miles of the Authority’s Niagara Power Project.

Projected Availability

As of December 31, 2018, a balance of 101 MW of RP was available for reallocation to eligible businesses.

Current Allocations

As of December 31, 2018, 128 allocations of RP had been approved by the Authority to 72 companies totaling 344 MW. All current RP allocations, including recipient name, location and region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit III to this Report. All program statistics include pending and in-service allocations.

As a result of new allocations awarded in 2018, 20 created jobs were added under the RP program. As of the end of the 2018 fiscal year, the RP program was supporting a total of 19,434 jobs.

Compliance Information

In 2018, Authority staff conducted its annual compliance review of customers receiving hydropower under the RP Program covering the reporting period of January 2017 through December 2017. The compliance review examined contract compliance in the Supplemental Commitment Areas.

Of all RP customers included in this compliance review reporting period, 67 customers received RP for an entire 12-month period and thus were in a position to be evaluated for compliance.

⁶ For purposes of this Report, the Authority is interpreting the term “forfeited” to mean any instance of surrender of previously-allocated power whether due to non-compliance, a lack of need for any portion of an allocation, reduction in the business operations of a customer, or some other reason.

Bausch + Lomb in Rochester (Monroe County) is one of the best-known and most respected health care brands in the country. The facility on Goodman Street receives nearly three megawatts of power under the ReCharge New York program and expects to begin taking down its ReCharge New York expansion allocation in 2019 tied to its recently completed \$218 million expansion project.

The underlying RP contract requires customers to achieve at least a 90% compliance rate for each Supplemental Commitment in order to avoid compliance action. As it did with the RNY Power Program, the Authority chose to enforce Supplemental Commitments of RP customers at a 90% level for this specific compliance review reporting period. Where the Authority took compliance action against non-compliant customers, it also adjusted the Supplemental Commitments of such customers in light of the reductions made to the power allocations and contract demands of such customers. As a result of compliance action taken for this compliance review reporting period, the Authority reduced power allocations and contract demands for 1 RP customer. The total allocation reduction was 0.5 MW.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year for noncompliance or other reasons is approximately 18.6 MW.⁷

It is not possible to identify precisely what portion of forfeited power was reallocated because at any given time there is always some amount of unallocated power. Comparing the total amount of power allocated as of the close of the reporting year with the total amount of power allocated as of the close of the previous year may provide a rough indication of allocation trends although such information may not account for changes in allocation levels that occur within a particular reporting year.

D. Preservation Power

Program Details

Chapter 313 of the Laws of 2005 established the “Preservation Power” (“PP”) program relating to allocations of hydropower within the counties of Jefferson, St. Lawrence and Franklin Counties from quantities of power sold to Alcoa and GM Powertrain from the St. Lawrence-FDR Power Project. The PP program is comprised of 490 MW, including 245 MW of firm hydropower currently sold to Alcoa.

Projected Availability

As of December 31, 2018, a balance of 229.75 MW of PP was available for reallocation to eligible businesses.

Current Allocations

As of December 31, 2018, 9 allocations of PP to companies had been approved by the Authority totaling 260.25 MW. All current PP allocations, including recipient name, location and region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit IV to this Report. All program statistics include pending and in-service allocations.

As of the end of the 2018 fiscal year, the PP program was supporting a total of 1,909 jobs.

Potsdam Specialty Paper, Inc., St. Lawrence County, NY A current ReCharge New York customer, Potsdam Specialty Paper, Inc. (St. Lawrence County) is planning to begin takedown of its Preservation Power allocation award in 2019, as it recently began operating its recently-added paper and film coating production line.

⁷ For purposes of this Report, the Authority is interpreting the term “forfeited” to mean any instance of surrender of previously-allocated power whether due to non-compliance, a lack of need for any portion of an allocation, reduction in the business operations of a customer, or some other reason.

Compliance Information

In 2018, Authority staff conducted annual compliance review of customers receiving hydropower under the PP Program covering the reporting period of January 2017 through December 2017. The compliance review examined contract compliance in 3 areas: (1) job retention; (2) power utilization; and (3) capital investment.

Of all PP customers included in this compliance review reporting period, 2 customers received PP an entire 12-month period and thus were in a position to be evaluated for compliance. Both customers were found to be in compliance and therefore no compliance action was taken.

Forfeiture and Reallocation

There was no power forfeited during the current reporting year for noncompliance or other reasons.⁸

E. High Load Factor Power

Program Details

The High Load Factor Power (“HLF”) program provides for the allocation of power to energy-intensive industries. HLF power is now sourced from the market, and therefore provides limited benefits. Consequently, all but three HLF allocations have expired.

Current Allocations

As of December 31, 2018, three allocations of HLF power are currently allocated to three companies totaling 18.5 MW. These HLF allocations are listed in Exhibit V to this Report.

F. Expansion Power Net Revenues for Industrial Incentive Awards

The Authority is required no less often than annually to identify the net revenues produced by the sale of EP, and further to identify an amount of the net revenues from the sale of EP that will be used for Industrial Incentive Awards. See PAL § 1005 (eight undesignated paragraph). “Net revenues” is defined to mean “any excess of revenues properly allocated to the sales of expansion power over costs and expenses properly allocated to such sales.”

For the year ending December 31, 2018, \$13,772,000 in net revenues was produced by the sale of EP. In 2018, \$4,307,840 of net revenues was paid out in Industrial Incentive Awards.

G. Western New York Economic Development Fund

The Western New York Economic Development Fund (“Fund”) was created by Chapter 58 (Part GG) of the Laws of 2012 to support economic development in Western New York. It consists of a fund, known as the “Western New York Economic Development Fund” (“Fund”), created and administered by the Authority. It is funded with the aggregate excess of revenues received by NYPA from the sale of EP and RP produced at NYPA’s Niagara Power Project that was sold in the wholesale energy market over what revenues would have been received had such power been sold on a firm basis to an eligible EP or RP customer (defined in the statute as “net earnings”).

*Long-time Western New York hydropower customer **General Motors in Tonawanda (Erie County)** manufactures automotive engines at its powertrain campus. More than 20 megawatts of clean hydropower keeps the GM facilities running daily around the clock.*

As noted in the introduction to this Report, NYPA is required to include in this Report an accounting for the subject reporting year that provides (1) the amount of EP and RP sold into the wholesale market, and (2) the “net earnings” paid into the Fund for the reporting year.

The amount of EP and RP sold into the wholesale market for the 2018 period totaled 1,111,784 megawatt-hours. As of December 31, 2018, the Authority had deposited a total of \$41,474,000 into the Fund since inception of the program.

⁸ For purposes of this Report, the Authority is interpreting the term “forfeited” to mean any instance of surrender of previously-allocated power whether due to non-compliance, a lack of need for any portion of an allocation, reduction in the business operations of a customer, or some other reason.

H. Northern New York Economic Development Fund

The Northern New York Economic Development Fund (“Fund”) was created by Chapter 545 of the Laws of 2014 to support economic development in Northern New York. It consists of a fund, known as the “Northern New York Economic Development Fund,” created and administered by the Authority. It is funded with the aggregate excess of revenues received by the Authority from the sale of energy associated with “St. Lawrence county economic development power” sold by the Authority in the wholesale energy market over what revenues would have been received had such energy been sold on a firm basis under a contract between the Authority and the Town of Massena Electric Department (defined in the statute as “net earnings”).

As noted in the introduction to this Report, NYPA is required to include in this Report an accounting for the subject reporting year that provides (1) the amount of St. Lawrence County economic development power sold into the wholesale market by the Authority, and (2) the “net earnings” paid into the Fund for the reporting year.

The amount of power sold into the wholesale market for the 2018 period totaled 122,654 megawatt-hours. As of December 31, 2018, the Authority had deposited a total of \$4,004,000 into the Fund.

I. Cost to Provide Economic Development Power Programs

The Authority incurs no net costs from the RNY, RP, EP and PP power programs, as its costs are recovered in the rates paid to the Authority by the program participants.

Moog, Inc. with its world headquarters in East Aurora (Erie County) specializes in the design and manufacturing of motion and fluid controls and control systems for applications in aerospace, defense, industrial and medical devices. It's campus employs thousands of Western New York residents and benefits from more than five megawatts of clean hydropower under the Replacement and Expansion Power programs.

ReCharge New York Customers as of December 31, 2018
