Introduction

This “2023 Report to the Governor and Legislative Leaders on Power Programs for Economic Development” (“Report”) is submitted by the Power Authority of the State of New York (the “Authority” or “NYPA”) pursuant to Public Authorities Law (“PAL”) §§ 1005(18), (23) and (24)(e).

Subdivision 18 provides:

18. For the purpose of furnishing the state with systematic information regarding the status and the activities of the authority, the authority shall submit to the governor, the president of the senate, speaker of the assembly, the minority leader of the senate and the minority leader of the assembly, within ninety days after the end of its fiscal year, a complete and detailed annual report on each economic development power program it administers. Such annual report shall include, but not be limited to, the following information:

a. the number of recipients of economic power program benefits, the economic region in which each recipient is located, the type and amount of assistance provided, megawatts of power awarded, length of current contract, current contract compliance status, last audit, number of jobs retained and/or added in the fiscal year, approximate energy efficiency savings and amount of power reallocated from previous years due to forfeited benefits; and¹

b. cost to the authority to provide economic development power programs during the previous fiscal year.

Subdivision 23 provides:

23. The authority shall include in the annual report prepared pursuant to subdivision eighteen of this section, an accounting for the subject year that provides (a) the amount of expansion power and replacement power sold into the wholesale market by the authority, and (b) the net earnings, as such term is defined in section one hundred eighty-nine-a of the economic development law, paid into the western New York economic development fund.²

Paragraph (e) of subdivision 24 provides:

(e) The authority shall include in the annual report prepared pursuant to subdivision eighteen of this section, an accounting for the subject year that provides the amount of St. Lawrence County economic development power sold into the wholesale market by the authority, and the net earnings paid into the northern New York economic development fund.

To simplify the presentation of the information required by PAL § 1005(18), (23) and (24)(e), the Authority has combined the reporting requirements of these statutory provisions in this Report.

¹None of the statutes authorizing the programs discussed in this Report require a program participant to establish energy efficiency savings in connection with the receipt of power under the program. Therefore, the Authority is unable to report on this specific information.

²PAL § 1005(14) calls for reporting on the status of “economic development power,” a program created by Chapter 32 of the Laws of 1987 which was, in the program’s later years, supported with market-based power. Components of that program were allowed to expire or were repealed in view of the creation of the ReCharge New York Power program in 2011. Therefore, the economic development power program is no longer administered. Accordingly, there is no information to report on economic development power in response to PAL § 1005(14).

A. ReCharge New York Power

Program Details

Chapter 60 (Part CC) of the Laws of 2011 (“Chapter 60”) created the ReCharge New York (“RNY”) Power program. The RNY Power program makes 910 megawatts (“MW”) of “ReCharge New York Power” (“RNY Power”) available to “eligible applicants” for the purpose of attracting new businesses and retaining and expanding existing businesses throughout the State of New York.

The RNY Power resource is comprised of: (1) fifty percent (50%) of firm hydroelectric power from the Authority’s Niagara and Saint Lawrence-FDR hydroelectric projects (“RNY Hydropower”) that was withdrawn, effective August 1, 2011, from the utility corporations that had purchased such power for the benefit of domestic and rural consumers; and (2) fifty percent (50%) of power procured by the Authority through market sources, a competitive procurement process, or Authority sources (other than the Niagara and Saint Lawrence projects) (collectively, “RNY Market Power”).

Pursuant to Chapter 60, the Authority has been authorized, as of July 1, 2012, to “make available, contract with and sell” to eligible applicants such RNY Power allocations as are recommended by the Economic Development Power Allocation Board (“EDPAB”). RNY allocations consist of equal parts of RNY Hydropower and RNY Market Power.

Hudson River Fruit Distributors receives 90 kilowatts of low-cost ReCharge New York power in exchange for 20 jobs and a five-year capital investment commitment of \$250K.

In its facility in Grand Island, New York, Life Technologies Corporation is supported by the governor’s ReCharge New York Program, which provides qualifying businesses and not-for-profits with lower energy costs in exchange for commitments to retain or create jobs. Life Technologies Corporation was awarded 506 kilowatts of ReCharge New York power supporting more than 554 jobs and \$5M in capital investments.

Projected Availability

As of December 31, 2023, a balance of 16.6 MW of RNY Power was available for allocation to eligible applicants.³

Current Allocations

As of December 31, 2023, 1,045 allocations of RNY Power had been approved by the Authority for 751 eligible applicants totaling 893.4 MW. All current RNY Power awards, including recipient name, location, region, MW of power awarded, length of current contract, and total number of jobs committed to be retained or added are listed in Exhibit 1 to this Report. All program statistics include pending, suspended, and in-service allocations.⁴

In 2023, Authority staff conducted a cost savings analysis for RNY customers for the period of January 1, 2022, to December 31, 2022. It was determined that RNY Power allocations collectively provided program participants an estimated cost benefit of nearly \$125 million. The estimated

³ This amount of unallocated RNY Power may not be available to all eligible applicants. The underlying statute specifies set-asides and caps on the amount of RNY Power that may be allocated for purposes of business retention and expansion, and certain categories of eligible applicants (e.g., small businesses and not-for-profit corporations). See Economic Development Law § 188-a(c)(4).

⁴ Examples of pending allocations include awarded allocations that (i) have not yet been addressed in a contract between NYPA and the awardee, and (ii) have been addressed in such a contract, but not yet placed into service by the awardee.

Precision Label currently has two allocations totaling 176 kilowatts of ReCharge New York power in exchange for 46 jobs, two that are new, and a total capital investment commitment of \$500K.

cost benefits are based on a comparison of the cost of RNY Power versus the local electric utility standard tariff rates, reflecting estimated commodity and delivery costs.

As of the end of 2023, the RNY Power program was supporting the retention and/or creation of 416,599 jobs.

Compliance Information

In 2023, Authority staff conducted its eleventh annual compliance review of customers receiving power allocations under the RNY Power program for the reporting period from July 1, 2021, through June 30, 2022. The compliance review examined RNY Power customer contract compliance in three areas: (1) job retention; (2) capital investment; and (3) power utilization (the “Supplemental Commitment Areas”). All RNY customers included in this compliance review reporting period received RNY Power for an entire 12-month period and thus were able to be evaluated in the Supplemental Commitment Areas.

The underlying RNY Power contract specifies the customer’s commitments for job retention, capital investment and power utilization (collectively, the “Supplemental Commitments”). The Authority may reduce a customer’s RNY Power allocation and contract demand if the customer fails to achieve at least a 90% compliance rate for a specific Supplemental Commitment.

In response to the COVID-19 pandemic, the NYPA Board of Trustees approved an adjustment of the job and/or capital investment commitments pertaining to the July 1, 2021 to June 30, 2022 reporting period for customers failing to achieve at least a 90% compliance rate in their job and/or capital investment commitments. No allocations were reduced based on compliance action.

Burly Brothers Land and Cattle Company L.L.C. was awarded 50 kilowatts of low-cost ReCharge New York Power in exchange for 5 new jobs and a capital investment commitment of \$1.45 million.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year is approximately 38.3 MW.⁵ This amount reflects customers who did not seek to extend the term of their power allocation, resulting in the allocation's expiration or those customers who voluntarily left the program. This amount does not include reductions from compliance related action, due to the jobs and/or capital investment adjustments mentioned above. It is not possible to identify precisely what portion of forfeited power was reallocated because at any given time during the reporting year there is some amount of unallocated power.

B. Western New York Hydropower: Expansion Power and Replacement Power

Program Details

Under PAL § 1005(13), the Authority is authorized to contract, allocate or reallocate directly, or by sale for resale, 250 MW of firm hydroelectric power as "Expansion Power" ("EP") to eligible businesses in the State located within 30 miles of the Niagara Power Project, provided that the amount of Expansion Power allocated to businesses in Chautauqua County on January 1, 1987, continues to be allocated in such county. "Replacement Power" ("RP") consists of 445 MW of firm hydropower generated by the Authority at its Niagara Project in accordance with PAL § 1005(13). RP is available to eligible businesses with facilities located within 30 miles of the Niagara Power Project.

Projected Availability

As of December 31, 2023, a balance of 19.6 MW of EP and a balance of 22.7 MW of RP was available for reallocation to eligible businesses.

Current Allocations

As of December 31, 2023, 129 allocations of EP had been approved by the Authority totaling 230.4 MW. All current EP allocations, including recipient name, location, and region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit 2 to this Report. All program statistics include pending and in-service allocations.

As of December 31, 2023, 165 allocations of RP had been approved by the Authority totaling 422.3 MW. All current RP allocations, including recipient name, location and region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit 2 to this Report. All program statistics include pending and in-service allocations.

As of the end of the 2023 fiscal year, the EP and RP program was supporting a total of 38,822 jobs.

Compliance Information

In 2023, Authority staff conducted its annual compliance review of customers receiving hydropower under the EP and RP Program covering the reporting period of January 1, 2022 through December 31, 2022. The compliance review examined contract compliance in the Supplemental Commitment Areas.

All EP and RP customers included in this compliance review reporting period received EP and/or RP for an entire 12-month period and thus were able to be evaluated for compliance.

In response to the COVID-19 pandemic, the NYPA Board of Trustees approved an adjustment of the job and/or capital investment commitments pertaining to the January 1, 2022

Sumitomo Rubber USA, LLC is a Western New York Hydropower customer with multiple Expansion Power and Replacement Power allocations totaling 15,591 kilowatts in return for committing to 1,327 jobs and \$192.1M in capital investments.

⁵ For purposes of this report, the Authority is interpreting the term "forfeited" to mean any instance of surrender of previously allocated power whether due to a lack of need for any portion of an allocation, a reduction in the business operations of a customer, or some other reason.

to December 31, 2022 reporting period for customers failing to achieve at least a 90% compliance rate in their job and/or capital investment commitments. No allocations were reduced based on compliance action.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year was approximately 0.8 MW.⁶ This amount does not include reductions from compliance related action, due to the jobs and/or capital investment adjustments mentioned above.

It is not possible to identify precisely what portion of forfeited power was reallocated because at any given time there is always some amount of unallocated power. Comparing the total amount of power allocated as of the close of the reporting year with the total amount of power allocated as of the close of the previous year may provide a rough indication of allocation trends although such information may not account for changes in allocation levels that occur within a particular reporting year.

C. Preservation Power

Program Details

Chapter 313 of the Laws of 2005 established the “Preservation Power” (“PP”) program providing for the sale of 490 MW of St. Lawrence-FDR Power Project hydropower to eligible businesses within the counties of Jefferson, St. Lawrence, and Franklin Counties.

Projected Availability

As of December 31, 2023, a balance of 122.5 MW of PP was available for reallocation to eligible businesses.

Current Allocations

As of December 31, 2023, 15 allocations of PP to 12 companies had been approved by the Authority totaling 367.5 MW. All current PP allocations, including recipient name, location and region, MW of power awarded, length of current contract, current contract compliance status and total number of jobs committed to be retained and/or added are listed in Exhibit 3 to this Report. All program statistics include pending and in-service allocations.

As of the end of the 2023 fiscal year, the PP program was supporting a total of 2,178 jobs.

Compliance Information

In 2023, Authority staff conducted annual compliance review of customers receiving hydropower under the PP Program covering the reporting period of January 1, 2022 through December 31, 2022. The compliance review examined contract compliance in the Supplemental Commitment Areas.

All PP customers included in this compliance review reporting period received PP an entire 12-month period and thus were able to be evaluated for compliance.

In response to the COVID-19 pandemic, the NYPA Board of Trustees approved an adjustment of the job and/or capital investment commitments pertaining to the January 1, 2022 to December 31, 2022 reporting period for customers failing to achieve at least a 90% compliance rate in their job and/or capital investment commitments. No allocations were reduced based on compliance action.

Forfeiture and Reallocation

The amount of power forfeited during the reporting year for noncompliance, or other reasons is 0 MW.⁶ This amount does not include reductions from compliance related action, due to the jobs and/or capital investment adjustments mentioned above.

Empire State Mines is a Northern New York customer with a 2,000 kW Preservation Power allocation in exchange for 100 new jobs and \$33.8M in capital investments. The company was also awarded a Northern New York Power Proceeds award of \$330,000.

⁶ For purposes of this report, the Authority is interpreting the term “forfeited” to mean any instance of surrender of previously allocated power whether due to a lack of need for any portion of an allocation, a reduction in the business operations of a customer, or some other reason.

Micron CEO Sanjay Mehrotra said on their pending allocation, *“The combined efforts at the federal, state, and local level paved the way for Micron to realize the largest private investment ever made in New York state history. We are thrilled to make this significant investment in New York, making the Empire State the location of the biggest leading-edge memory site in the U.S. We chose this location for many reasons, but most importantly — Central New York offers a rich pool of diverse talent, including communities that traditionally have been underrepresented in technology jobs. This historic leading-edge memory megafab will deliver benefits beyond the semiconductor industry by strengthening U.S. technology leadership, as well as economic and national security, driving American innovation and competitiveness for decades to come.”*

It is not possible to identify precisely what portion of forfeited power was reallocated because at any given time there is always some amount of unallocated power. Comparing the total amount of power allocated as of the close of the reporting year with the total amount of power allocated as of the close of the previous year may provide a rough indication of allocation trends although such information may not account for changes in allocation levels that occur within a particular reporting year.

D. High Load Factor Power

Program Details

The High Load Factor Power (“HLF”) program provides for the allocation of power to energy-intensive industries. HLF power is sourced from the market.

Current Allocations

As of December 31, 2023, nine allocations of HLF power are currently allocated totaling 752.9 MW. These HLF allocations are listed in Exhibit 4 to this Report. All program statistics include pending and in-service allocations.

E. Expansion Power Net Revenues for Industrial Incentive Awards

The Authority is required no less often than annually to identify the net revenues produced by the sale of EP, and further to identify an amount of the net revenues from the sale of EP that will be used for Industrial Incentive Awards. See PAL § 1005 (eight undesignated paragraph). “Net revenues” is defined to mean “any excess of revenues properly allocated to the sales of expansion power over costs and expenses properly allocated to such sales.”

Western New York Expansion Power customer **Americold Logistics, LLC** in Dunkirk, New York, was awarded 830 kilowatts of low-cost hydropower in exchange for the creation of 60 jobs and a capital investment commitment of \$40.4 million.

For the year ending December 31, 2023, \$9.4 million in net revenues was produced by the sale of EP. In 2023, \$27,711,920 of net revenues was paid out for Industrial Incentive Awards.

F. Western New York Economic Development Fund

The Western New York Economic Development Fund (“Fund”) was created by Chapter 58 (Part GG) of the Laws of 2012 to support economic development in Western New York. The Fund created, and administered by the Authority is funded with the aggregate excess of revenues received by NYPA from the sale of EP and RP produced at NYPA’s Niagara Power Project that was sold in the wholesale energy market over what revenues would have been received had such power been sold on a firm basis to an eligible EP or RP customer (defined in the statute as “net earnings”).

As noted in the introduction to this Report, NYPA is required to include in this Report an accounting for the subject reporting year that provides (1) the amount of EP and RP sold into the wholesale market, and (2) the “net earnings” paid into the Fund for the reporting year.

The amount of EP and RP sold into the wholesale market for the 2023 period totaled 1,497,574 megawatt-hours. As of December 31, 2023, the Authority had deposited a total of \$84,063,000 into the Fund since inception of the program.

***Eastman Machine Company**, a Western New York Economic Development Fund customer, created 6 jobs during the construction phase. NYPA supported the project with a Western New York proceeds award of \$170K. Eastman Machine has sustained a long history in Buffalo.*

G. Northern New York Economic Development Fund

The Northern New York Economic Development Fund (“Fund”) was created by Chapter 545 of the Laws of 2014 to support economic development in Northern New York. It consists of a fund, known as the “Northern New York Economic Development Fund,” created and administered by the Authority. It is funded with the aggregate excess of revenues received by the Authority from the sale of energy associated with “St. Lawrence County economic development power” sold by the Authority in the wholesale energy market over what revenues would have been received had such energy been sold on a firm basis under a contract between the Authority and the Town of Massena Electric Department (defined in the statute as “net earnings”).

As noted in the introduction to this Report, NYPA is required to include in this Report an accounting for the subject reporting year that provides (1) the amount of St. Lawrence County economic development power sold into the wholesale market by the Authority, and (2) the “net earnings” paid into the Fund for the reporting year.

The amount of power sold into the wholesale market for the 2023 period totaled 61,320 megawatt-hours. As of December 31, 2023, the Authority had deposited a total of \$8,494,000 into the Fund since inception of the program.

H. Cost to Provide Economic Development Power Programs

The Authority incurs no net costs from the RNY, RP, EP and PP power programs, as its costs are recovered in the rates paid to the Authority by the program participants.

New York Power Authority ReCharge New York Allocations as of December 31, 2023
